DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Drake et al. (5577607). Drake teaches a case having a base member, a tool with handles, and fastening device between the handles as shown in Fig. 6.
3. Claims 1, and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Davis (1088406). Davis teaches a case having a base member, a tool with handles, and fastening device between the handles as shown in Fig. 1 and 2.
4. Claims 1, and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Garland (5388740). Garland teaches a case having a base member, a tool with handles, and fastening device between the handles as shown in Figs. 1 and 2.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3727

6. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Davis in view of Maine (2138978). It would have been obvious to one of ordinary skill in the art to provide a clip in Davis as taught by Maine to provide an alternative securing means.

7. Claim 1, 2, and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Borsuk (D463664) in view of either Davis or Garland. Borsuk meets all claimed limitations except for the fastening means. It would have been obvious to one of ordinary skill in the art to provide fastening means in Borsuk as taught by either Davis or Garland to enable one to secure similar tools.
